Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 09 July 2003.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Upon further consideration , the following non-final action is taken. Any inconvenience is regretted.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-8, 17-20, 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sheffer in view of Hermitage. The patent to Sheffer teaches structure substantially as claimed including a body (10) defining a longitudinal axis and including several sequentially disposed layers in end-to-end disposition (figs. 1-2 @ 11-17) score lines (20), tongues (30) and openings (40), the structure of corrugated fiberboard the only difference being that the direction of the flutes is not specifically stated as being extending in the direction of the longitudinal axis. However, the use of flutes in a particular direction would have been obvious in the art since it would depend on the

Art Unit: 3637

direction of reinforcement desired. Further, the patent to Hermitage (at figs 2-3) teaches the use of flutes extending in the direction of the longitudinal axis. It would have been obvious at the time of the invention to modify the structure of Sheffer to include a knowledge of extending the flutes in a specific direction, as being an obvious modification in view of one having ordinary skill in the art and further shown by Hermitage since such structures are conventional alternative structures used in the same intended purpose of providing reinforcement of structures, thereby providing structure as claimed. The use of known conventional structures, such as adhesives, staples, welding, friction fitting would have been obvious. Further, applicant is given judicial notice that such connecting structures are conventional structures used for the purpose of connection. It is noted that a weakened material area is at a valley of the flute or at the score line of the layer. To provide a weakened area is inherent to where the corrugated structure is folded.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.
